

SENQU BRIDGE OPENS TO TRAFFIC AHEAD OF OFFICIAL LAUNCH

On 25 March 2026, the Senqu Bridge was opened to public traffic as part of its commissioning process, marking a key milestone in Phase II of the Lesotho Highlands Water Project.

While the official inauguration is scheduled for April, this early opening allows for operational readiness and public access ahead of the formal ceremony.

The Senqu Bridge stands as a significant addition to Lesotho's infrastructure network, improving connectivity, enhancing access to remote areas, and supporting tourism development in the highlands.

LHDA extends its appreciation to all engineers, contractors, and stakeholders whose dedication has made this achievement possible.
