

Building Phase II, Building Trust – The LHDA Press Club

On Friday, October 10 2025, the LHDA hosted a Press Club at the LHDA Tower, continuing its efforts to strengthen open communication around the Lesotho Highlands Water Project (LHWP) Phase II.

The session brought together media members for updates on project progress and discussions on how to work together to ensure accurate, transparent, and impactful communication.

A project of this magnitude is not only about engineering—it is about people, transparency, and trust. The LHDA recognises the media as a key partner in ensuring that Basotho and the region are kept informed about both achievements and challenges.

By keeping open lines of communication, the LHDA reaffirms its commitment to integrity and accountability. The Press Club marks another step in ensuring that the LHWP remains a project of national pride—built on trust, openness, and shared knowledge.
